

INSPIRATION

The inspiration for the Nautilus submarine is rooted in Jules Verne's classic novel, "Twenty Thousand Leagues Under the Sea." The novel, published in 1870, tells the story of Captain Nemo and his submarine, the Nautilus, as they embark on a journey beneath the seas. The novel's depiction of a technologically advanced underwater vessel captivated audiences and has continued to inspire engineers, designers and explorers alike.

The Nautilus is a modern reinterpretation of the fictional Nautilus, with state-of-the-art technology and luxury amenities, it is built to take its passengers on an adventure of a lifetime, just like Captain Nemo and his crew.

The Nautilus is not just a means of transportation but a true exploration vessel, built to take on the most challenging and remote places of the ocean, just like in the novel.

ONE OF A KIND

The experience of being aboard the Nautilus is truly one of a kind. As you step inside the submarine, you will be struck by its luxurious and cutting-edge design. The Nautilus is not just a mode of transportation, it is a true underwater sanctuary. The special Air filtration system aboard the Nautilus provides both fresh air and temperature control, ensuring that you will always be comfortable during your journey.

As you explore the depths of the ocean, you will have the opportunity to see marine life that few have ever laid eyes on.

The submarine's unique design allows for ample natural light to flood the interior, creating an atmosphere that is both serene and breathtaking.

The Mezzanine Observation Lounge offers panoramic views of the ocean, while the main deck lounge and foredeck lounge provide comfortable spaces to relax and take in the sights. The saloon, the central space in the Nautilus, is the perfect place to gather with your fellow passengers and share stories about the day's adventures.

DEVELOPMENT

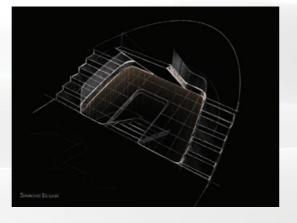

The development of the Nautilus was a true labor of love for U-Boat Worx and the interior design studio Officina Amare.

According to the U-Boat Worx design team, "The Nautilus was created with the goal of seamlessly blending technology and luxury to create a truly unique underwater experience."

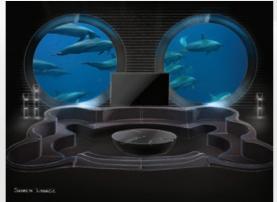

The team spent countless hours researching and experimenting with different materials and designs to ensure that the Nautilus would not only be a technological marvel, but also a luxurious and comfortable space for passengers. "We wanted to create a submarine that would transport passengers to a whole new world, while still providing all the comforts of home," said Bert Houtman. CEO of U-Boat Worx

The result is a beautiful and technologically advanced submarine that has been praised by critics and customers alike. "It's been an honor to be a part of this project and see it come to life," said Houtman. "I can't wait for people to experience the Nautilus for themselves and see all the hard work and passion that went into its creation."

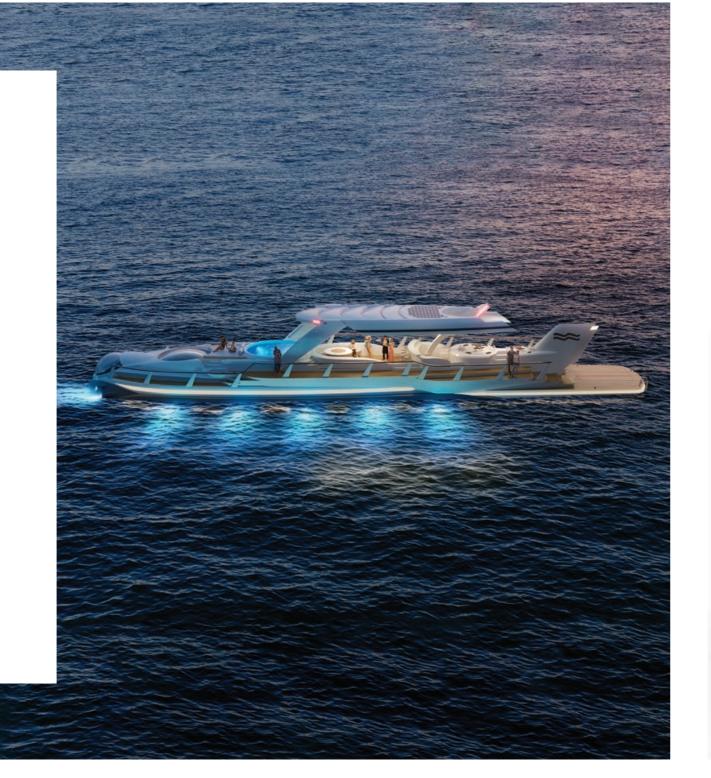

PART II THE UNDERWATER YACHT

THE NAUTILUS

The diesel-electric yacht submarine Nautilus has a depth rating of 150 meters, with a surface cruise speed of 9 knots and an underwater speed of 4 knots.

When functioning as a yacht, the Nautilus will offer a massive sundeck equipped with a freshwater pool, a bar, and a luxurious dining table. This al fresco arrangement will be retracted before the submersible slips below sea level.

The Nautilus's interior features a 50 m2 (538 sq. ft.) dinner and lounge area with four circular windows each with diameters close to 4 meters. Initial designs for the sub have a master stateroom and four guest rooms, as well as sleeping quarters for up to six crew. A fully equipped galley makes cooking an underwater meal simple and fun. However layouts are fully customisable, and available in a large variety of configurations.

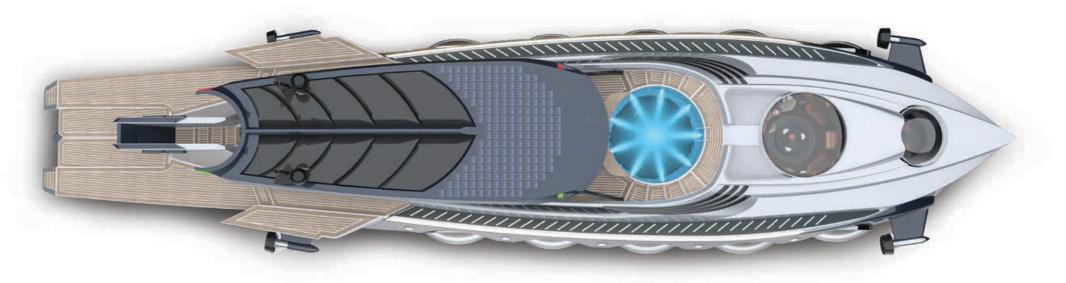

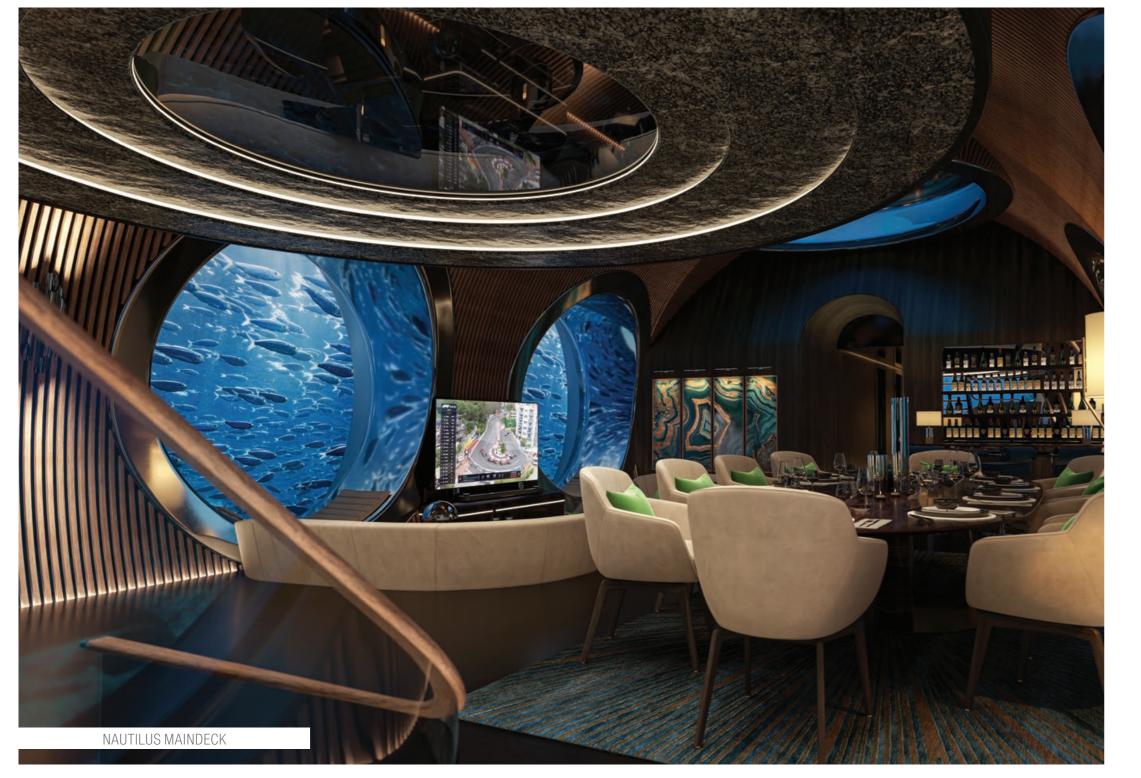

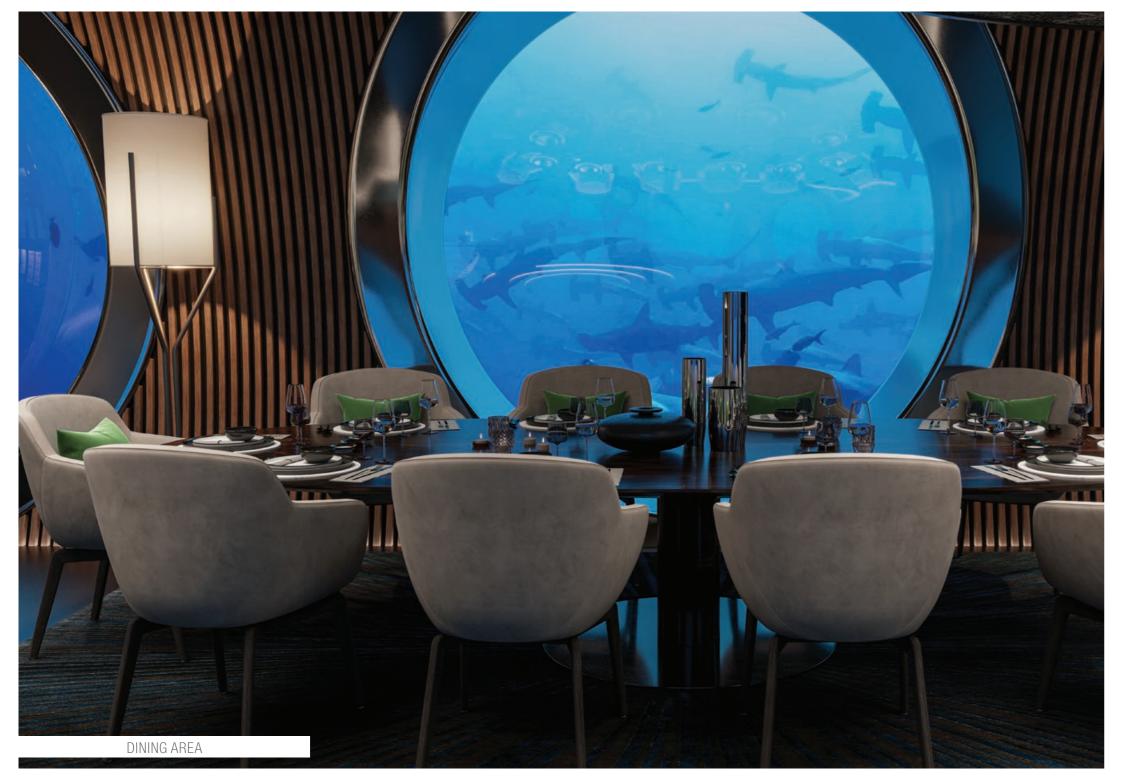

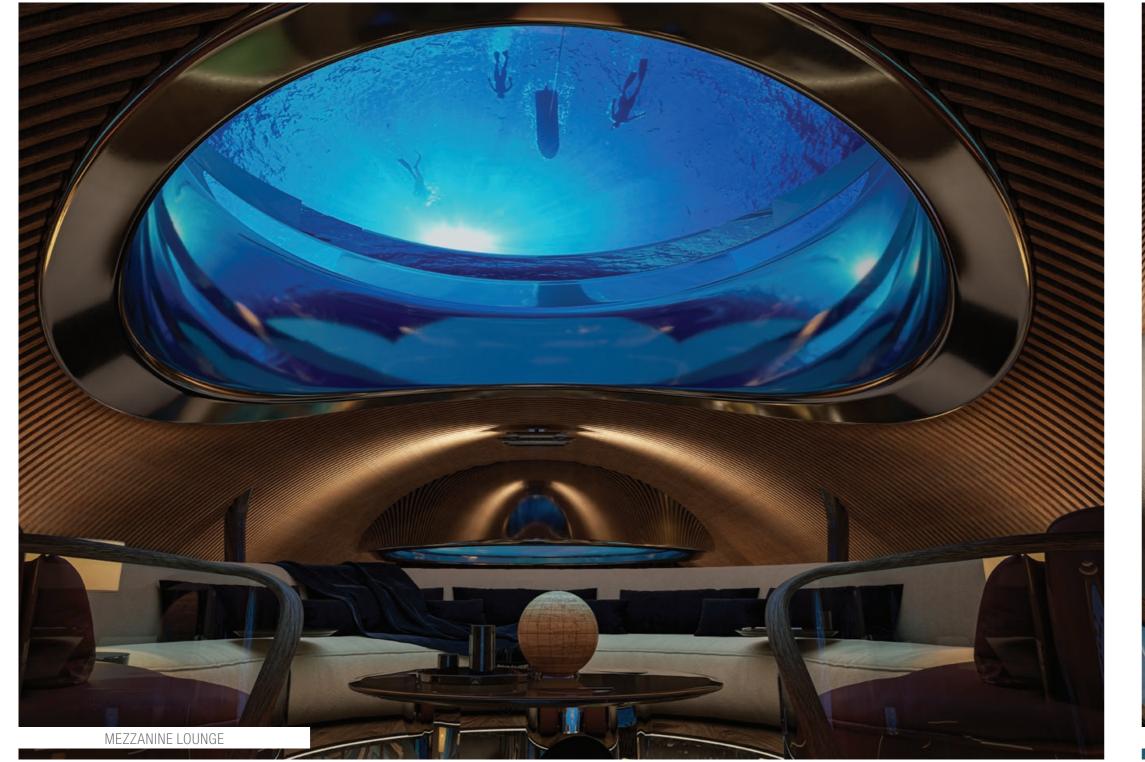

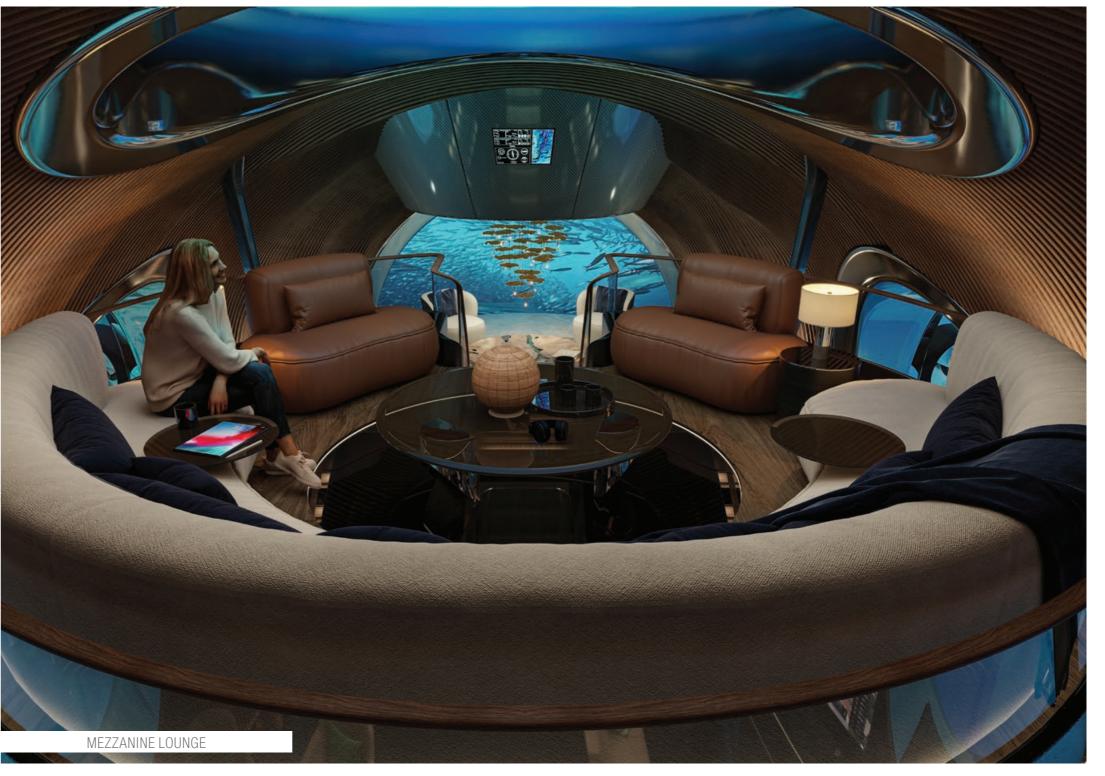

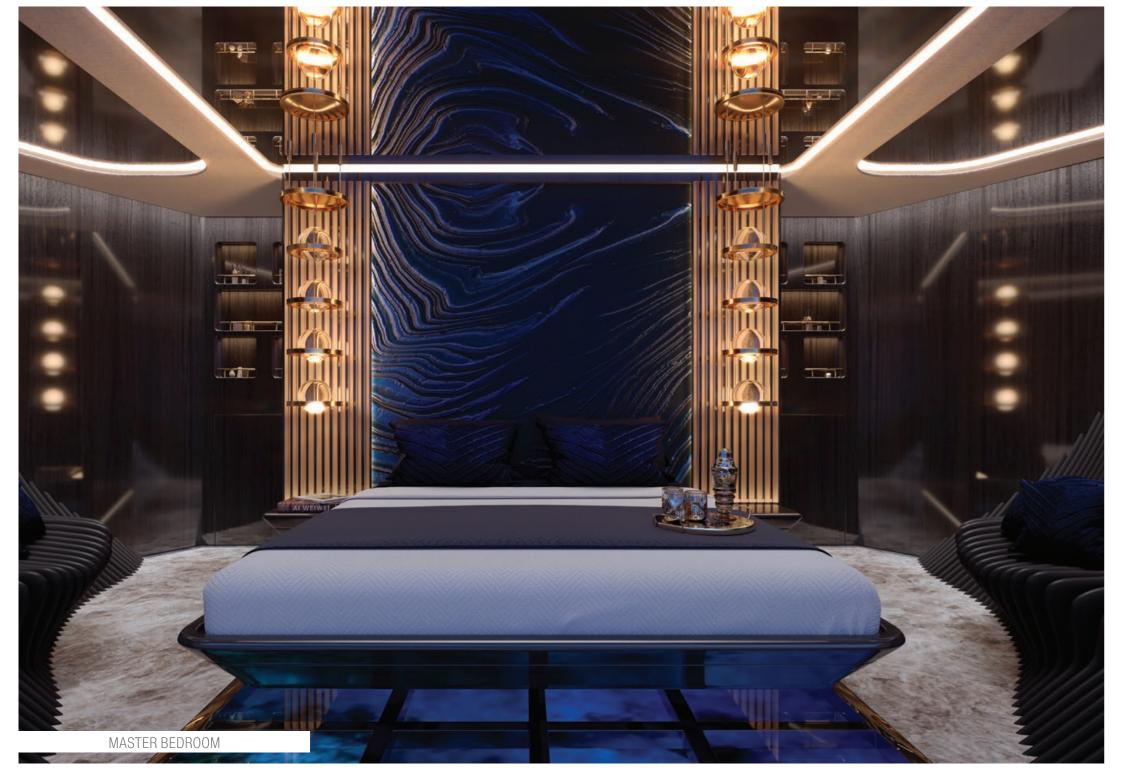

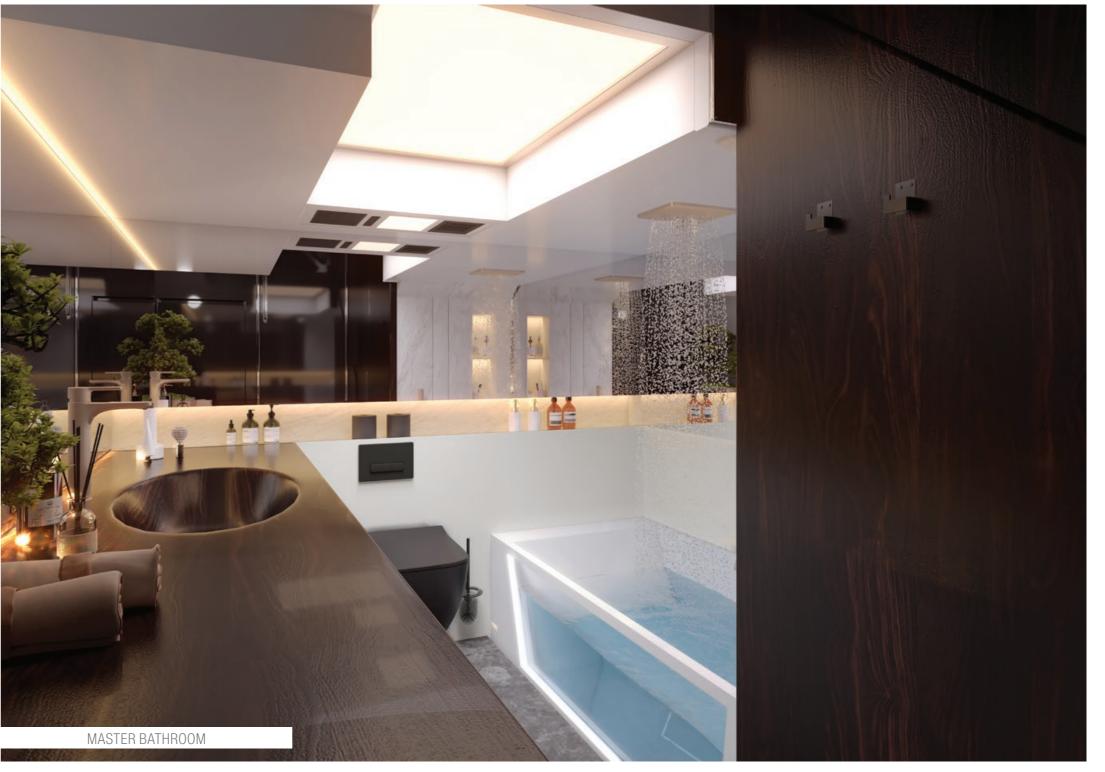

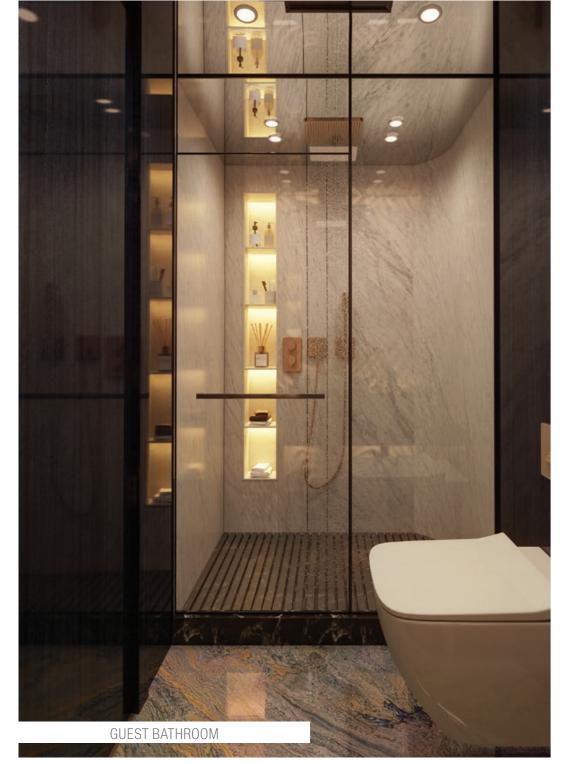

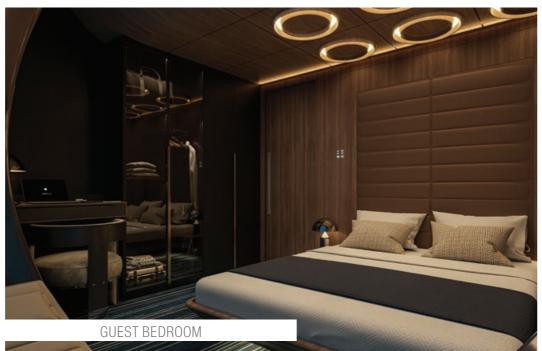

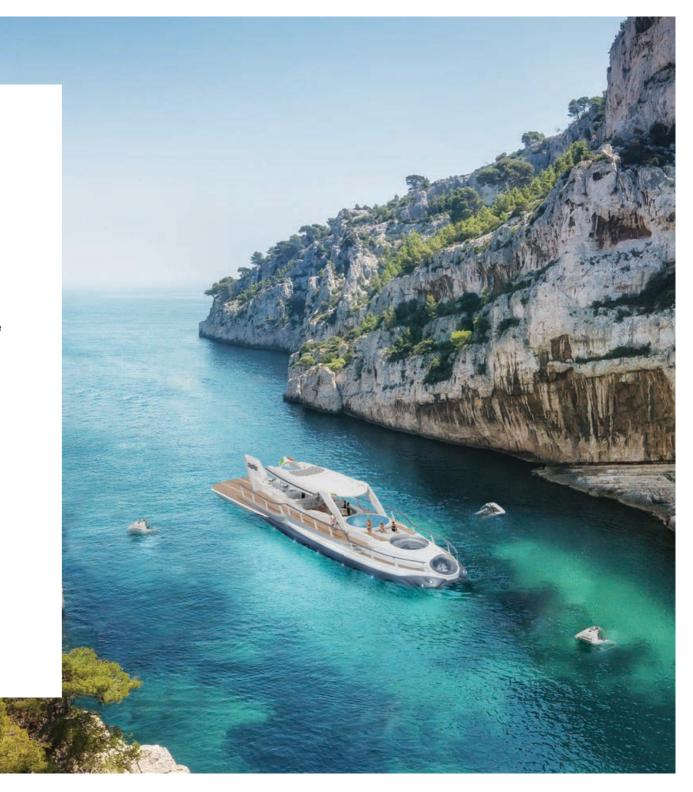

The Nautilus submarine is capable of visiting a variety of ports, both above and below the surface. With its advanced diesel electric propulsion system and lithium battery system, the Nautilus can easily navigate through the depths of the ocean, allowing for breathtaking views of the underwater world. From coral reefs to shipwrecks, the Nautilus can take you to some of the most remote and hard-to-reach locations on Earth.

Owning the Nautilus means you possess a yacht that functions seamlessly both on the surface and underwater. In the event of cruising fatigue or tumultuous seas, submerging beneath the waves is always an option, providing the utmost comfort when exploring the underwater realm.

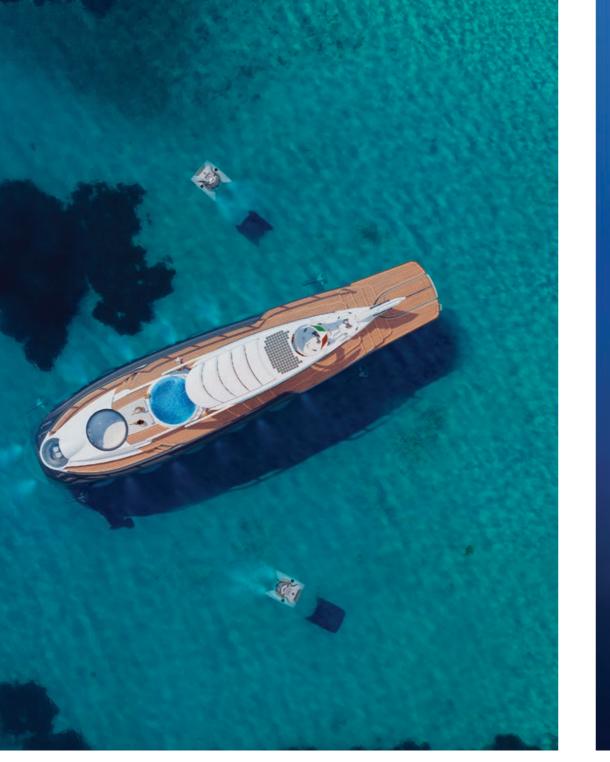

With the Nautilus, the possibilities for exploration are endless, giving you the opportunity to experience the beauty and mystery of the sea in a way that has never before been possible.

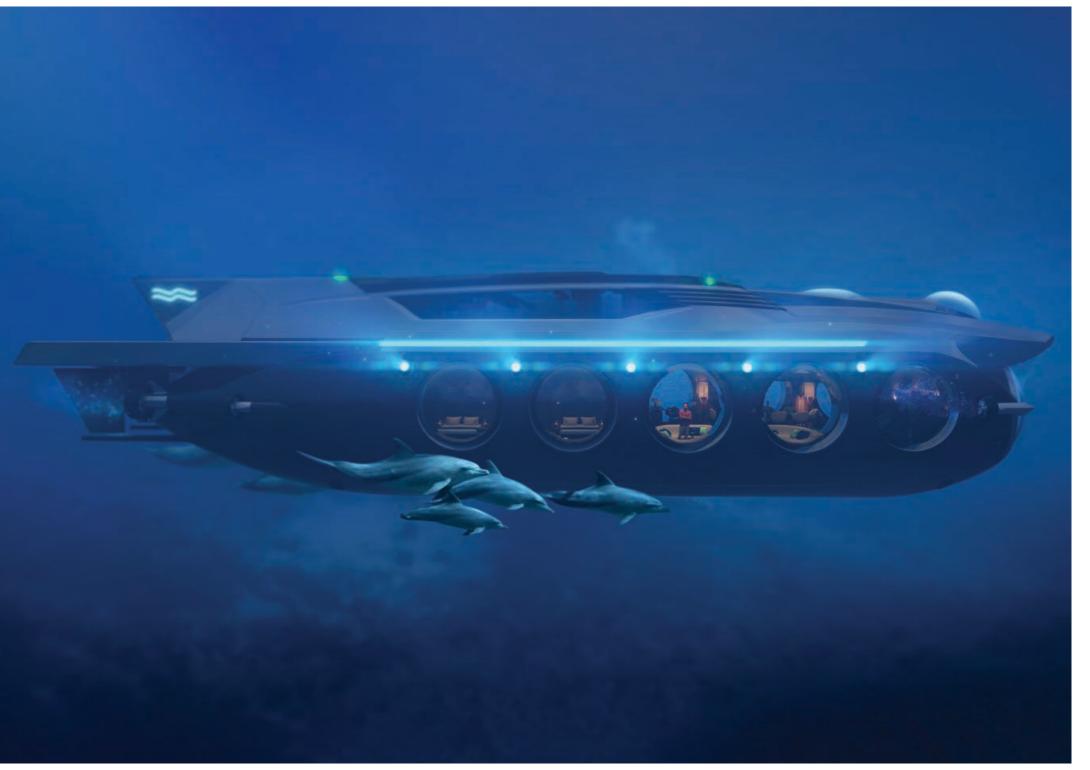

The Nautilus is an ideal way to explore the underwater world. Its large windows offer unparalleled views of the surrounding sea life, and its quiet electric thrusters allow guests to explore without disturbing marine life.

Guests can also use the Nautilus to explore underwater caves, reefs, and other unique underwater landscapes.

The Nautilus is also designed for entertaining guests. Whether you're floating at the surface, or are submerged the Nautilus is perfect for hosting intimate dinner parties, cocktail receptions, and other gatherings. The lounge and dining areas offer stunning views of the underwater world, making for a unique and unforgettable dining experience. Guests can also relax on the sundeck, soaking up the sun while enjoying the breathtaking views of the surrounding sea.

Guests aboard the Nautilus can expect luxurious accommodations that rival those found in high-end hotels. The Nautilus offers spacious guest cabins, each with its own large window offering stunning views of the underwater world. The cabins are elegantly designed and furnished with comfortable bedding and other amenities to ensure guests have a comfortable and relaxing stay. The Nautilus also features a large saloon and mezzanine lounge, perfect for relaxing and socializing with other guests. The Nautilus offers a one-of-a-kind underwater experience that is both luxurious and unforgettable. Whether exploring the underwater world, entertaining guests, or simply relaxing on the sundeck, the Nautilus offers something for everyone.

ABOUT

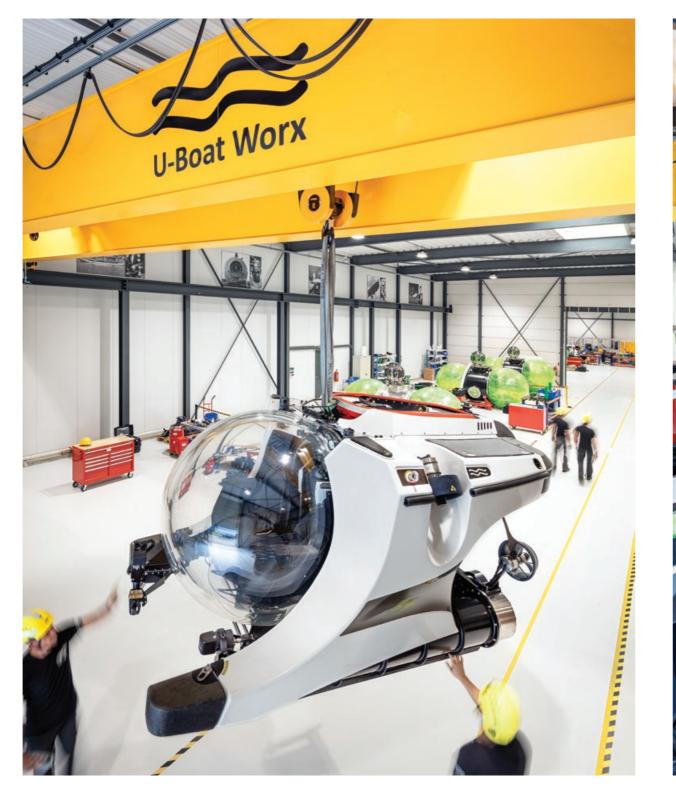

At U-Boat Worx we do everything possible to give you the best and safest diving experience possible. Since our start in 2005 we have grown to become the largest private submersible builder in the world. Our large fleet consists of 26 different models, and has changed the standards for private submersibles.

Each U-Boat Worx submersible is engineered and built to the highest standards. Leading Classification Society DNV individually classes each submersible by extensively testing each component. It is our innovation and in-house engineering that have led to many "world-firsts" and achievements that illustrate how our owners explore with the best submersibles.

We are the only submersible manufacturer who builds in series. The benefits of this approach are straightforward. Our customers enjoy the best quality, highest reliability and design at industry-defining prices.

The engineers and technicians in our Netherlands-based factory take individual care of each submersible assuring the highest level of precision and craftsmanship, to provide customized solutions for a particular mission or a bespoke design.

It is the quality of our submersibles and the dedication of the team that makes a U-Boat Worx submersible the best choice for everyone involved, from the owner and his guests, to the crew and operator.

KEY FACTS

- Largest manned submersible manufacturer in the world
- Own pilot training center in Curaçao
- Own overseas service & support center in Curação
- Only submersible manufacturer with full in-house engineering
- Most experience with yacht integration
- Only manufacturer with DNV certification on all models
- First manufacturer to produce in series
- Largest number of submersible pilots trained
- Defacto standard for the cruise industry
- Most submersibles delivered and in operation

110 STAFF FOR ENGINEERING, MANUFACTURING AND SUPPORT

SUBMERSIBLES SOLD, BUILT AND IN OPERATION

26 DIFFERENT MODELS TO CHOOSE FROM

16 SUBMERSIBLES BUILT FOR CRUISE VESSELS

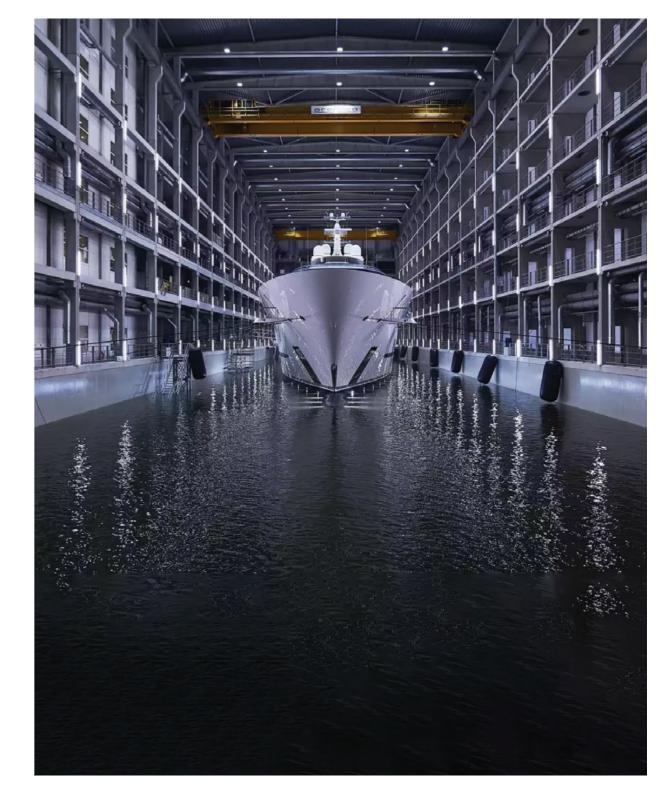

Welcome to the world where luxury yachting and submarines meet each other. U-Boat Worx only work with the best partner to ensure the Nautilus meet your needs.

Built at a renowned Dutch shipyard, the Nautilus is constructed with the utmost attention to detail, ensuring that every aspect of the yacht is of the highest quality.

The shipyard where the Nautilus is built is known for its dedication to craftsmanship, and has a long-standing reputation for excellence in the yachting industry. The shipyard's skilled team of engineers, designers, and craftsmen bring years of expertise to the construction of every yacht, ensuring that each one is built to the highest standards.

In addition to the shipyard's expertise, the Nautilus is built with components from proven suppliers in the yachting industry. These suppliers have been carefully chosen for their ability to provide high-quality components that meet the exacting standards of luxury yachts.
