U-BOAT WORX

Building Perfection	28	Key Facts	31
---------------------	----	-----------	----

SOMETHING ELECTRIFYING IS COMING

This highly evolved addition to the U-Boat Worx range is a hybrid of our extensive fleet. Engineered to deliver 100 kW of thrust which provides incredible maneuverability due to the sub's streamlined design. Delivering formidable performance in complete comfort. The advanced wing design and best-in-class propulsion system provide the smoothest and fastest underwater ride allowing for steep climbs and dives.

All these industry-leading attributes combine to provide a safe, comfortable and exhilarating underwater experience while maintaining an almost 360-degree view through the optically perfect acrylic sphere.

If you are seeking an experience that will get your heart pumping, look no further. The Super Sub dive experience is like flying a jet underwater. Imagine being able to nimbly follow schools of marine life, or witness large predators on their hunt.

BUILDING THE DREAM

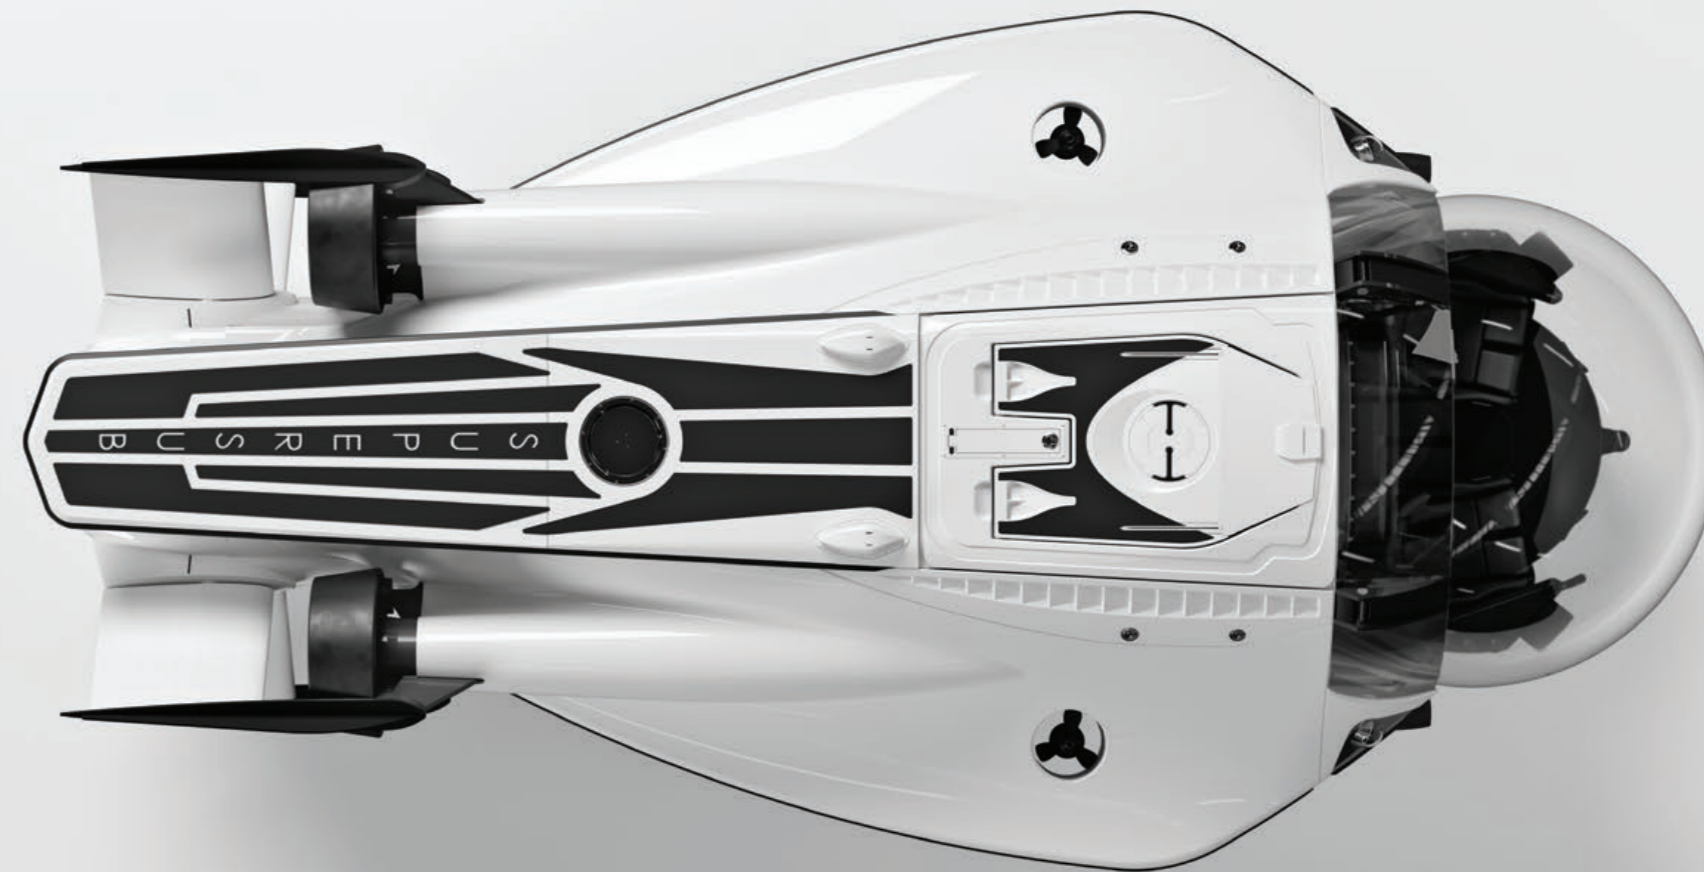

At U-Boat Worx, we have spent countless hours, passion, and expertise in crafting the ultimate dream of underwater exploration - the Super Sub. From the very first stroke of the design pen to the final touch of polished perfection, every step in building the Super Sub has been a journey of absolute dedication and continuous innovation.

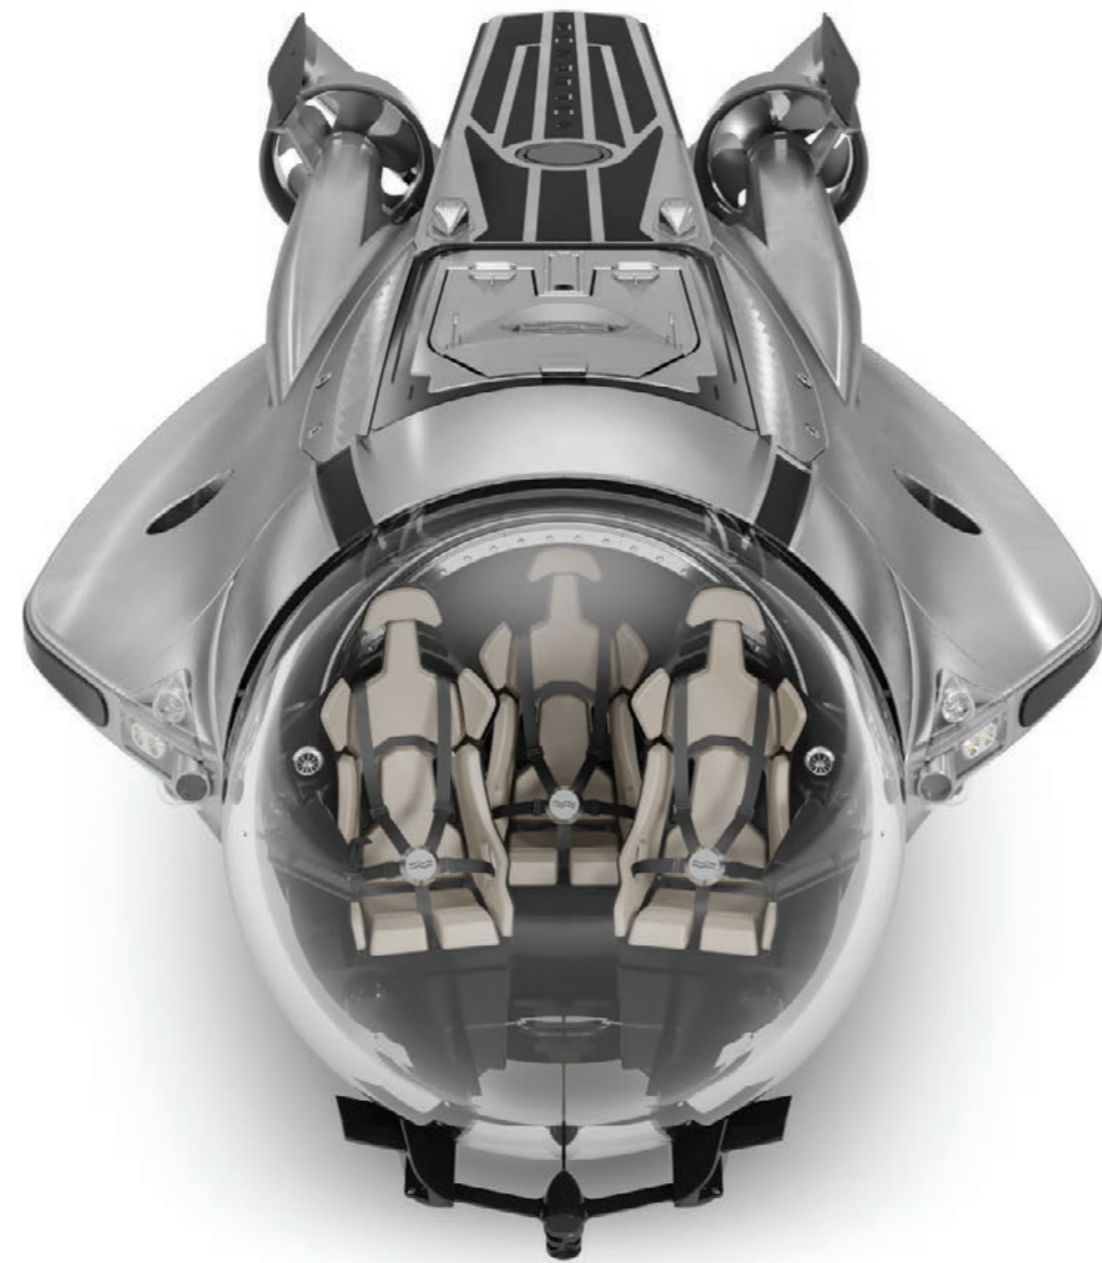

Building the Super Sub starts with envisioning a vessel that breaks barriers, transcends expectations, and redefines the art of safe underwater exploration. Our team of visionary engineers and designers pour their hearts into creating a vessel that blends performance, safety, and style, all while embracing the wonders of the world beneath the surface.

SUPERSUB

ULTIMATE HIGH-PERFORMANCE SPORTS SUB

SPECIFICATIONS

SPEED: 10 KNOTS

DEPTH: 300 METERS / 1000 FEET

WEIGHT: 9,000 KG

OCCUPANCY: 1 PILOT / 2 PASSENGERS

ENDURANCE: UP TO 18 HOURS

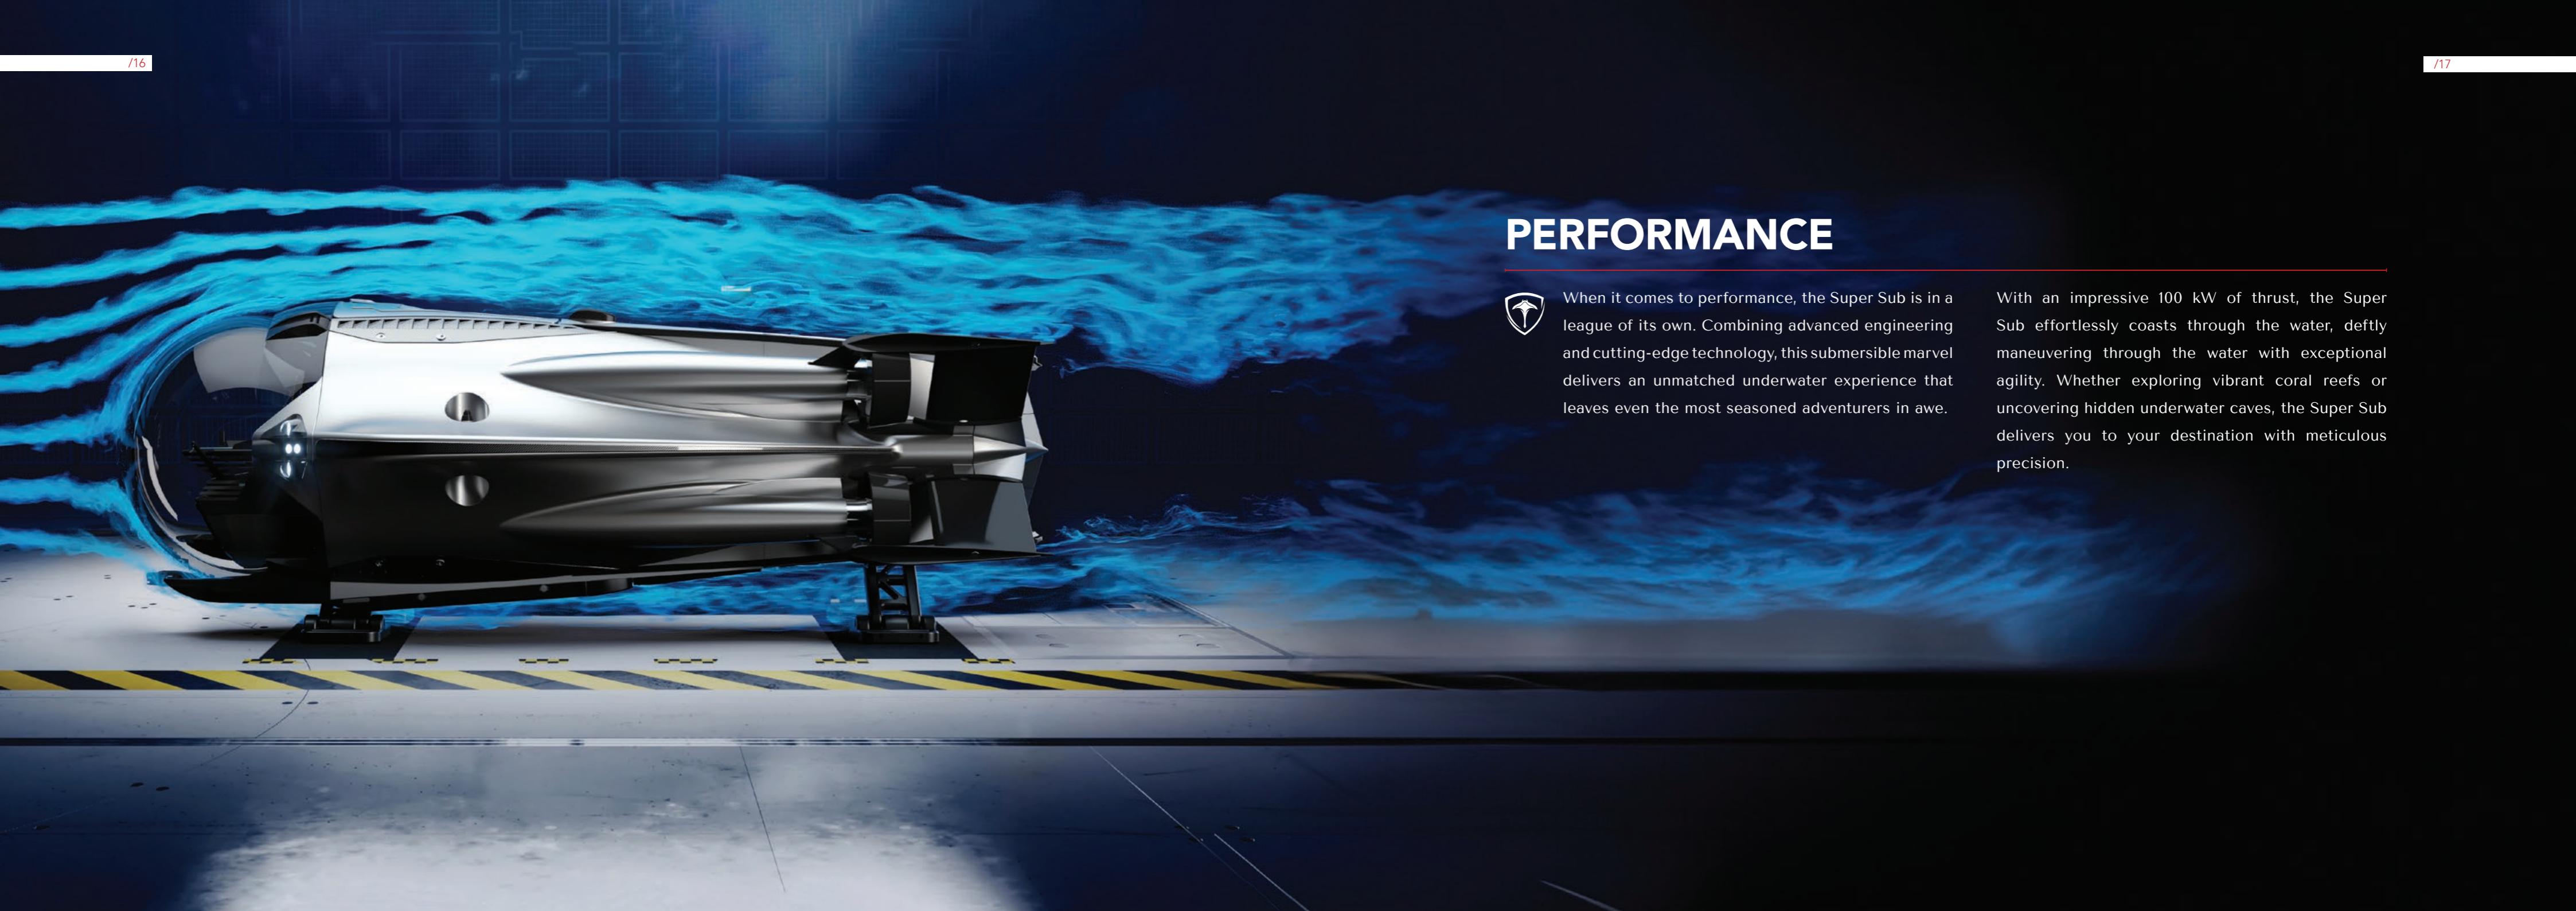

INNOVATIONS

With an awe-inspiring 100 kW of thrust, the Super Sub surges effortlessly through the water, defying the forces of gravity. This immense power, judiciously harnessed by our expert engineering team, propels you into the underwater realm with unmatched velocity and precision. Feel the exhilarating gliding sensation as the Super Sub transports you on a mesmerizing journey through the depths.

Beauty meets function in the Super Sub's streamlined design. Every curve, contour, and angle has been meticulously crafted to achieve optimal hydrodynamics, reducing resistance, and maximizing efficiency. This intelligent design not only enhances performance but also ensures a smooth ride through the water, creating an unparalleled sense of effortless grace.

PERFORMANCE

When it comes to performance, the Super Sub is in a league of its own. Combining advanced engineering and cutting-edge technology, this submersible marvel delivers an unmatched underwater experience that leaves even the most seasoned adventurers in awe.

With an impressive 100 kW of thrust, the Super Sub effortlessly coasts through the water, deftly maneuvering through the water with exceptional agility. Whether exploring vibrant coral reefs or uncovering hidden underwater caves, the Super Sub delivers you to your destination with meticulous precision.

DYNAMICS

Diving in the ultra-streamlined Super Sub can feel like flying underwater. Its hydrodynamic design and performance capabilities demand an intuitive interface.

Six powerful thrusters work efficiently thanks to the fluid dynamics of the hull design. Four horizontal thrusters in combination with the hydroplanes allow

the submersible to adapt to any possible heel or pitch, affording optimal viewing to the occupants. The Lithium-ion batteries in the Super Sub are specially engineered for low weight and endurance, with high-capacity cells giving the thrusters the energy they need for ultimate performance and speeds up to 10 knots underwater.

DESIGN

The Super Submarine's sleek silhouette glides effortlessly through the water, embodying a sense of grace and sophistication that is unique to U-Boat Worx. Designed to minimize drag and maximize

hydrodynamics, this aerodynamic form ensures smooth, efficient navigation through the underwater world.

INTERIOR

U-Boat Worx has always prioritized offering our clients the optimal underwater experience; our commitment to ensuring the clearest possible view is no exception. Which is why we place our flawlessly clear, fully-acrylic pressure hull at the front of the submersible. This innovative design ensures an unobstructed view in every direction, free from any visual interference from ballast tanks, batteries, or other components.

Step inside the Super Sub and you'll be captivated by the emphasis on sophistication and luxury. U-Boat Worx has painstakingly selected the finest materials, creating an ambiance of refined elegance. Comfort is paramount, which is why we've outfitted the interior with premium leather seats, placing you directly in front of the action. Whether you're exploring historic wrecks, dazzling coral reefs, or uncovering hidden marine wonders, the plush interior of the Super Sub elevates the underwater adventure to an entirely new level.

BUILDING PERFECTION

At U-Boat Worx we do everything possible to deliver the best and safest diving experience possible. Since our launch in 2005, we have grown rapidly to become the largest private submersible manufacturer in the world. Our extensive fleet consists of 26 different models, and has set the standard for private submersibles globally.

Each U-Boat Worx submersible is engineered and built to the highest performance and safety specifications. Leading Classification Society DNV classes each individual submersible, rigorously and extensively testing each component.

Our peerless innovation and in-house engineering expertise has led to many "world-firsts" - achievements of distinction that exemplify the incomparable quality of U-Boat Worx submersibles. U-Boat Worx is the only submersible manufacturer who builds in series. The benefits of this approach are clear - our customers benefit from owning the best quality, safest, and most reliable submersibles at industry-defining prices.

The engineers and technicians in our Netherlands-based factory take individual responsibility for - and personalised care of - each submersible, assuring the highest level of precision and craftsmanship while providing customised solutions - such as bespoke design for a particular mission.

KEY FACTS

Key Facts

- Largest manned submersible manufacturer in the world
- Own pilot training center in Curaçao
- Own overseas service & support center in Curaçao
- Only submersible manufacturer with full in-house engineering
- Most experience with yacht integration
- Only manufacturer with DNV certification on all models
- First manufacturer to produce in series
- Largest number of submersible pilots trained
- Defacto standard for the cruise industry
- Most submersibles delivered and in operation

Key Numbers

Staff for engineering, manufacturing and support	110
Submersibles sold, built and in operation	60
